HAUL TRUCK SPOTTERS

Designed to assist the haul truck operator to know exactly where to position the truck under an excavator for the best loading spot with the superior visibility that the spotter provides.

We supply 2 different options of this product:

Option #1 without the center ball

Option #2 with the center ball.

Our product provides the following features:

- superior visibility
- option to change out center ball
- center is protected by cable covered in rubber that absorbs impact
- will not damage equipment
- higher visibility at night due to reflective strips resulting in higher safety value.
- decreased downtime of equipment

10448 McEachern Street, Maple Ridge, British Columbia, Canada V2W 0H8
